---

## PROFESSIONAL SUMMARY

AI & Machine Learning student passionate about building production-ready AI applications using Python, Machine Learning, and Generative AI. Experienced in developing AI-powered automation workflows, machine learning models, and OpenAI API integrations. Currently expanding expertise in Retrieval-Augmented Generation (RAG), LangChain, FastAPI, Docker, Computer Vision, and Cloud deployment.

---

## EDUCATION

|                                                                                                                   |                    |
|-------------------------------------------------------------------------------------------------------------------|--------------------|
| <b>DPGU School of Management &amp; Research (SMR), Pune</b><br><i>Master of Computer Applications (MCA) — 82%</i> | <b>2025 – 2027</b> |
| <b>MJ College, Jalgaon, Maharashtra</b><br><i>Bachelor of Computer Applications (BCA) — 75%</i>                   | <b>2023 – 2025</b> |

---

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                            |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| <b>Data Scientist Intern – Rubixe (AI Company), Bengaluru</b><br><ul style="list-style-type: none"><li>Built machine learning pipelines for prediction and classification tasks</li><li>Performed data preprocessing, feature engineering, and model evaluation</li><li>Developed Python automation workflows for AI and data processing</li><li>Worked with structured datasets using Pandas, NumPy, and Scikit-learn</li><li>Contributed to production-oriented AI solutions</li></ul> | <b>May 2025 – Nov 2025</b> |

|                                                                                                                                                                                                                                                                                                               |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Predictive ITSM System</u></b><br><i>Python, SQL</i> <ul style="list-style-type: none"><li>Developed an ML system for IT service management prediction</li><li>Built classification models for service request prediction</li><li>Implemented feature engineering and preprocessing pipelines</li></ul> |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

- Processed structured datasets for training and evaluation

---

## **Employee Performance Prediction**

*Python, Django*

- Developed a machine learning model for employee performance prediction
- Integrated the prediction model with a Django backend
- Deployed the application for real-time predictions

---

## **TECHNICAL SKILLS**

### **Programming:**

Python, SQL

### **Machine Learning:**

Scikit-learn, Regression, Classification, Model Evaluation, Feature Engineering

### **Generative AI:**

LLMs, Prompt Engineering, OpenAI API, RAG (Learning), LangChain (Learning)

### **Computer Vision:**

OpenCV (Learning), YOLO (Learning)

### **Backend:**

FastAPI (Learning), REST APIs

### **Data Engineering:**

Pandas, NumPy, Data Pipelines, Web Scraping

### **Cloud & DevOps:**

Docker (Learning), AWS Basics

### **Tools:**

Git, GitHub, Jupyter Notebook, VS Code, n8n

---

## **CERTIFICATIONS**

- Certified Data Scientist – Nasscom
- Data Scientist – IABAC
- Data Scientist Intern – Rubix AI Solutions
- Data Scientist Trainee Certificate

---

## **ACHIEVEMENTS**

### **1st Place – Problem-Solving Hackathon | Modern College of Engineering**

- Built a practical AI-based solution for a real-world problem

### **1st Place – Hackathon | SNBP Spurthi Fest 2K26**

- Recognized for innovative project implementation
-
